

<https://fluorglass50years.sciencesconf.org>

The serendipitous discovery of the first fluorozirconate glasses occurred in March 1974. Fifty years later, Rennes University organizes a symposium to celebrate this anniversary. It will review the state of art of fluoride glass scientific achievements and industrial applications. Historical actors, leading researchers and industrial players will report their views and prospects for the future.

SPONSORING

We know that you share our interest in this scientific and human adventure.

Would you like to become a sponsor of this unique event ?

You will find in the table various possibilities to be associated with this symposium.
